

Bats

HI - TEC BAT

GACR-001 Test Cricket bat

English Willow Super A grade
Made from super A grade English Willow. This bat is fitted with a 12 piece oval shaped cane handle used only in top grade bats. Massive "sweet spot", improved profile for maximum power, thick edges and bow bat profile. Silky pick up and balance. Counter balanced handle assists bat pick up. Rubber toe guard gives the bat extra protection. Full fibre face protection.

★★★★★

- High grade English willow
- Improved profile for maximum power
- Massive sweet spot
- Rubber toe guard for extra protection

GACR-002 League Cricket Bat

English Willow B grade
Made from high grade B English Willow. This bat is fitted with a 9 piece cane handle. Massive "sweet spot", thick edges and bow bat profile, silky pick up and balance. Counter balanced handle assists bat pick up. Rubber toe guard gives the bat extra protection. Full fibre face production.

★★★★★

GACR-003 County Cricket Bat

English Willow C grade
High quality, hard pressed English Willow grade C, fitted with 9 piece cane handle. Ideal starter bat. Rubber toe guard gives the bat extra protection. Full fibre face production.

★★★★★

GACR-004 Club Cricket Bat

Kashmir Willow A grade
High quality, hard pressed Kashmir Willow grade A, bat with a natural wax finish. Fitted with 9 piece cane handle with super balance and high profile on hitting area. Rubber toe guard gives the bat extra protection. Full fibre face production.

★★★★★

	Over 158cm	Size 6
14-16	Up to 165cm	Size 6
	Over 165cm	Harrow
Over 16	Up to 170cm	Harrow
	Over 170cm	Full Size

Coaching / Training Bats

GACR-005 T/20 Cricket Bat

Made of super A grade English Willow, 12 piece cane handle. Increased power and faster airspeed. More 6's and 4's. Designed for the 20 over game. No change to batting technique. Extra long cane handle. Blade just 19 inch long.

GACR-006 Rubber Rebounder Practice Catching Cricket Bat

Made of grade A English Willow with special coating and 9 piece cane handle. Thick foam rubber face for catching adds extreme rebound properties to Wooden bat. Also available in grade A Kashmir Willow.

GACR-007 Middling Cricket Bat

Made from high grade A Kashmir Willow thin blade with 9 piece cane handle. Used by many professional cricketers to improve ball watching skills. Indispensible aid for improving batting skills.

GACR-008 Indoor Cricket Bat

Made from finest & lightest grade B Kashmir Willow. Bow shape to give exquisite balance & excellent overall rebound ping to the face. Larger profile allows extra exclusive power on all shots. Low middle for longer sweet spot. Rounded toe shape to combat the demands of indoor cricket. Fibre face for maintenance free use.

CRICKET BAT MAINTENANCE & WARRANTY POLICY

"If you believe your bat should not crack.... do not buy it from us"

-Gaurav Mahajan

Preparation and Maintenance of your new Bat

- Oiling of your new bat should happen before "Knocking-in"
- Oil your bat over 3-4 days. Ensure the back of the bat is oiled only on the 1st day. The blade, toe and edges can be oiled over the 4 full days. Apply oil evenly but do not over-oil or let oil get underneath bat labels.
- Knocking-in your bat far as long as you wish but not less than 2 weeks, or an hour a day. You may also lightly play your bat in.
- During the season avoid over oiling your bat as this makes the blade soft and overweight. A general light clean or polish with oil on the blade, edges and toe every 3 - 4 weeks would suffice.
- * If you wish to avoid oiling we suggest a Proface or Extratec sleeve. This helps prevent surface cracking and edges damage. (See below)

Water Damage

Crack in Toe

Knocking-in your new GAMA Bat

1. Prevents "excessive" damage or indentations
2. Will never totally reduce cracking or indentations
3. The longer you spend knocking-in, the longer the life span or your bat
4. Damage to a bat varies depending on the piece of willow and individual use but will not impair the efficiency of the bat; the technique used in preparation of the bat and edges is designed to withstand normal conditions.

Crack in Handle

GAMA does the initial preparation only, you must continue the work until the bat is ready for practice and match play. (See steps below, once you have received your bat from us)

Steps for Knocking-in

Use an old leather ball or a bat mallet and continue hitting the face, edges and toe area for about one hour daily for at least one week.

"Play-in" with a straight bat at the nets with an old ball as much as possible for 2 - 3 days.

Attempt to have two hard nets with old balls against quick bowling to check if the bat is ready.

⚠ No bat should be used in match conditions until it has been properly knocked-in.

Extratec/Proface/Clear Sleeve

We highly recommend the use of this sleeve on your bat. This clear sleeve is the best protection for the face and edges of cricket bats. **it is widely used by Test & First Class cricketers**

Crack in Shoulder

Crack in Blade

Principal causes of Damage

- Inaccurate Play
- Unprotected bat
- Cheap Hard Balls
- Dampness in Toe/Blade
- Severe Edging
- Yorkers Hitting Toe
- Bowling Machine Balls

Cricket Bat Warranty

A warranty is a goodwill agreement offered by all bat manufacturers to repair or replace a bat that has suffered damage believed not to be the fault of the customer. Warranty decisions are entirely at the discretion of GAMA.

All GAMA bats have a 12 month Warranty. Replacement bats will have a maximum of six months Warranty (from date of replacement) except where the original bat is less than six months old.

Bats will deteriorate even without use due to the natural drying out of the willow.

A Bat will not be replaced due to handle break, edge or surface cracking but will be repaired under warranty only in the first season of use.

Bats over 12 months old, from date of purchase, will be considered entirely at GAMA's discretion. There is no definite time that a cricket bat will last. The bat will deteriorate with use on the field and against bowling machine balls. Care for and maintain your bat to extend its life.

Guide to warranty conditions for cost free repair or replacement of bats

- None caused by dampness and swelling of toe
- None on edge & toe cracks caused by inaccurate play
- None due to heat damage
- None due to over oiling

Surface Cracking

Willow is a very soft material – some surface cracking and indentations will appear even after light use.

Do not panic. Surface cracking is not detrimental to the performance of your bat.

Lightly sand your blade, especially in the cracked areas. You can continue to use your bat. You may wish to strap your bat with fibreglass tape if the cracks appear harmful or excessive.

Polyarmor coated or Sleeved Bats

These bats do not require oil on the blade. The back of the bat can be oiled once or twice only while the toe requires regular oiling to prevent dampness. Controlled oiling is the best so the oil does not get under sleeve. "Knock-in" and "Play-in" your bat as usual.

Leather Balls

GACR-009 Test Cricket ball

Top quality alum tanned 4 pcs leather ball. Mens size 5.5 oz, 7 layers of cork/rubber & wool blend core for ideal bounce & feel. Top grade nylon thread 80 stitches used for shape retention and prominent seam. Entirely hand crafted. Perfect ball for International matches.

GACR-010 Premier League Cricket ball

Alum tanned 4 pcs leather ball. Mens size 5.5 oz, 4 layers of cork/rubber & wool blend core for ideal bounce & feel. Top grade nylon thread 70 stitches used for shape retention and prominent seam. Entirely hand crafted. Suitable for standard competitions.

Unique streamline light weight hi-density foam pad. Traditional yet upmarket wrap around construction. Light foam Tibia guard insert. Contoured lined knee bolsters. Butterfly straps and release tabs. Extended wing, knee & top hat. Available in Mens, Boys & Youth sizes.

GACR-026 Test Wicket Keeping Pads

Traditional design pads with kapok padded canes on front. High performance, foam filled shin bolster, padded knee bolster, 2" calf & ankle straps. Beautifully constructed wrap around pads. Available in Mens, Boys & Youth sizes.

GACR-027 County Wicket Keeping Pads

Moulded Lycra Wicket Keeping Pads. Ambidextrous design, ultra light weight pre-moulded dual density foam pads with 2" towelling elastic calf and ankle straps. Available in Mens, Boys, & Youth sizes.

Gloves

GACR-028 Test Batting Gloves

Anatomic pre-bent ultra protected, total flex high performance gloves of super class. Calf leather palm, carbonite P.U detailing with 14 pc moulding per glove. Super comfort. Mens & Youth sizes.

GACR-029 Club Batting Gloves

Magnificent international class construction & flexible protection. Deluxe lining for extra comfort, moisture management & air flow. Extra fibre reinforcement. Mens & Youth sizes.

GACR-030 League Wicket Keeping Gloves

Suction grip profile, extra tacky finish, silicon padded calf leather. Ventilated Air mesh & finger tip reinforcement. Excellent comfort & flexibility. Mens & youth sizes.

Hold All

GACR-031 Trolley Kit Bag

Made from heavy duty lined denier for extra durability. Vast double zipped top with "all round" opening. Large main compartment and two end pockets, one full length side pocket and one half length side pocket, ideal for storing coaching accessories. Includes a retractable handle and two wheels for easy maneuverability. Solid reinforced base.

Main Compartment: 100cm(L) x 40cm(H) x 40cm(W).

End Pocket x 2: 5.5cm deep

Half Side Pocket: 45cm x 24cm x 5.5cm

Full Length Side Pocket: 90cm x 24cm x 5.5cm

GACR-032 Cricket Coffin

Custom made for international travel out of aluminium and completely covered with felt mat for protection of equipment. Very robust but light weight. Fitted with superior lockable clasps, pull handles & heavy duty wheels.

Dimensions:

Width: 920 mm

Height: 310 mm

Depth: 400 mm

Net weight approx: 6 kg

Protection

GACR-033 Strapy Abdo box

Abdo Guard PVC extra large size with velcro strap, P.U. foam padded with perforations for ventilation.

GACR-039 Chest Guard EVA & Lycra

Made from high density, Pre-moulded EVA covered with lycra. With soft towel back & wide elastic. Mens & Youth sizes.

GACR-034 Padded Abdo Protector

P.V.C impact proof Abdo guards with P.U foam padding & holes for ventilation. Available in various colours. Mens, Youth & Boys sizes.

GACR-040 Arm Guard EVA & Lycra

Made from high density, Pre-moulded EVA covered with lycra. With soft towel back & wide elastic. Mens & Youth sizes.

GACR-035 Curved Abdo Guard

Abdominal guard protector with high grade polyurethane lining and impact proof. Curved pre-moulded for extra comfort. Perforated for air ventilation. Adult size.

GACR-041 Thigh Guard EVA & Lycra

Pre-moulded dual density foam thigh pad. Light weight multiflex design, lycra covered with towelling elastic leg straps. Mens & Youth sizes.

GACR-036 Padded Inner gloves

Padded Cotton inner gloves. Light weight inner gloves. Sweat absorption & comfort. Adult & Junior sizes.

GACR-042 Pad Man Shorts

Light weight stretch shorts, hexagonal high density foam padding, outer and inner thigh protection. Mens size.

GACR-037 Fingerless Inner Gloves

Cotton fingerless inner gloves. Light weight inner gloves. Sweat absorption & comfort. Adult & Junior sizes.
