

Interlocking Puzzle Mat

GAMA Interlocking EVA Puzzle Mat, 20 mm thick offers more impact absorption than Standard Foam Mats, plus they are two-sided, so you can flip your entire mat over at some point to expose the "new" bottom surface. These mats are embossed with our new non-slip basket-weave texture on both sides. Suitable for Martial arts and any strenuous activity like Aerobics, Yoga, Taekwondo, Wrestling, Judo and many more.

These mats may be used anywhere indoors, and can be used outdoors in shaded or partly sunny areas on a solid subsurface. Water will not harm them, but exposure to direct sunlight will cause certain colors to fade and shorten their useful life. If you are going to use them outdoors, it is best to provide a cover, like indoor/outdoor carpet or grass, to protect the mats from the sun's UV rays, which will ultimately break down the foam surface.

These mats are NOT rated for use under tall outdoor playground equipment such as swing sets, slides and other climbing equipment, but are suitable for low-height plastic play equipment and ground-level structures. Testing indicates these mats comply with Consumer Product Safety Commission guidelines for a MAXIMUM fall-height of 3-feet when used as play area fall protection.
