- Knurled transfer wheel for improved fluid pick up.
- All parts renewable and easily fitted.
- Complete with large rigid handle.
- Heavy duty 305 mm solid rubber tyred wheels for 60 mm (extra) ground clearance.
- 100 mm steel rollers, diameter of rear roller 135 - 140 mm, centre 105 - 110 mm, front 160 - 165 mm, tank lip 3" wide.
- For the professional grounds man.

Zinc Phosphated Knurled  
wheels with baked-on  
polyester powder coating

# Grounds Man

The Line marking machine....

Well made, robust machines, carefully designed to make line marking quick and easy. Large capacity tanks save frequent refilling and spillages.

Interchangeable marking wheels allow different line widths to suit differing sports regulations. All markers are Zinc phosphated and then finished with a baked-on polyester powder coating that provides a very tough, scratch resistant finish.
